PROFESSIONAL SUMMARY

Software Engineering graduate with experience in software development, automation, and web technologies across industry and academic settings. Strong problem-solving and communication skills, with experience working with stakeholders, gathering requirements, troubleshooting issues, and documenting solutions. Interested in expanding my skills in Microsoft 365, SharePoint, and digital workplace technologies.

EDUCATION

Bachelor of Engineering Sciences (B.E.Sc.) in Software Engineering (Co-op Program) 2021-2026

Western University, London, ON, Canada

- Dean's List (GPA: 3.7/4.0), Western Scholarship of Excellence

TECHNICAL SKILLS

Languages/Libraries: Java, Python, C++, C#, JavaScript, TypeScript, SQL, NoSQL (MongoDB), React, .NET, Git, HTML, CSS

Technologies/Frameworks: Qt, Flask, Node.js, Express.js, Next.js, Linux, REST APIs, AWS Cloud, Docker, CI/CD, GitHub

WORK EXPERIENCE

Web Developer - *Faculty of Science, Western University* Jul 2026 -Present

- Develop, test, and maintain web platforms and content management systems, supporting website redesign, accessibility compliance, and user experience improvements across the Faculty of Science.
- Collaborate with faculty, staff, and third-party stakeholders to implement website enhancements, maintain content accuracy, and support analytics, documentation, and platform maintenance initiatives.

Software Developer Intern - *Canada Life* Jan 2025 - Sept 2025

- Contributed to the modernization of legacy financial systems by redeveloping internal applications using .NET Core, C#, React, Angular, and AWS Cloud, improving scalability and maintainability.
- Collaborated with developers, analysts, and QA teams using GitHub-based workflows to deliver scalable software solutions supporting large-scale enterprise data systems.
- Participated in testing, debugging, deployment, and maintenance activities within cloud-based enterprise environments.

Software Developer Intern - *IO Industries* May 2024 - Jan 2025

- Built and integrated Qt6 from source within a Linux environment, utilizing shell scripting, build automation, dependency management, and open-source software repositories.
- Developed custom build configurations and automation tooling to streamline software deployment and improve development workflows.
- Authored technical documentation and procedures to support reproducibility, maintenance, troubleshooting, and future software upgrades.

Website Editor/Developer - *Schulich Dentistry* May 2023 - May 2024

- Developed a Python-based automation tool using BeautifulSoup to crawl, validate, and analyze website data, reducing manual effort by 90% and improving site navigation and SEO.

PROJECTS

AI-Powered Biometric Identification in Livestock - Capstone Project - *PrivIT Technologies & Canadian Sheep Federation*

- Developed an end-to-end **Python computer vision and machine learning pipeline** using YOLOv5 and FaceNet for automated livestock detection and biometric identification.
- Built data-processing, verification, and human-in-the-loop workflows using Python and Flask to support model inference and identification.

MemoryLane - *Sun Life, Best Health Hack, Hack Western 10*

- Developed a full-stack application supporting individuals with dementia using Python, Flask, MongoDB, Next.js, and cloud-based speech processing tools.
- Tools: Flask, Python, MongoDB, Next.js, Google Cloud Speech-to-Text API, InfoBip SDK, JS, REST.

EXTRA-CURRICULAR ACTIVITIES & INTERESTS

Executive Vice President, Hackathon Director, Tech Developer - *Western MSA* May 2023 - May 2026

- Held multiple leadership and technical roles spanning software development, project coordination, stakeholder engagement, and organizational operations.
- Led the development and deployment of the Western MSA website, supporting the digital needs of the student community.
- Directed Western University's first Islamic-themed hackathon, attracting 100+ participants and coordinating technical, logistical, and stakeholder initiatives.
